They should reach out to [press@epa.gov](mailto:press@epa.gov)  
Any idea who the reporter is?

Hey Troy –

Sorry to bother you but we're trying to chase down an answer for a couple of reporters in our District. One has gotten persistent in asking us for a press contact at EPA as he has not received a response from the contact he was given initially. Do you have a contact that we can share with him?

Thanks as always!

Melissa

Sven, thanks for that info. As always, we really appreciate it.

We have had a number of reporters asking for a press contact at the EPA, is there someone that we should recommend them emailing?

**Ian Whitson**  
Office of Congressman David Rouzer (NC-07)

Ian – thanks for checking in. Nothing new at this point except that EPA Region 4 will start to get sampling results this week. Please let me know if any additional questions. Looping in R4 and Matt Klasen for drinking water issues. Best,  
Sven

Hey Sven,  
Just checking in to see if there have been any new developments since last week? Our district director has a meeting with some local officials and wanted to update on EPA's actions.

Thank you again,

**Ian Whitson**  
Office of Congressman David Rouzer (NC-07)

**To:** Whitson, Ian; Klasen, Matthew  
**Subject:** Cong. Rouzer inquiry re: GenX

Ian, following up on your request, here's an update on GenX. EPA has initiated an investigation into Chemours' compliance with a 2009 order issued under TSCA for the production of GenX. This investigation will allow EPA to determine whether Chemours is in compliance with requirements of the order to control releases to the environment at the Fayetteville, NC, facility. EPA is also reviewing the additional toxicity data submitted by the company, as required under the consent order, and updating the risk assessment using the additional toxicity data specific to GenX. At the request of the North Carolina Department of Environmental Quality (NCDEQ), EPA has agreed to perform independent laboratory analysis for GenX in some of the water samples being collected by NCDEQ at 13 locations in the Cape Fear River over the next three weeks.

Please let me know if any additional questions. Thanks,  
Sven

Hey Sven,

The Congressman has a meeting with a representative from the Chemours company this afternoon and I was wondering if there were any updates?

Thank you again for all your help with this.

Best,

**Ian Whitson**

**Subject:** inquiry re: GenX

Hi Ian,

I am looping in my colleague Sven who works with our TSCA program office and he can track down information regarding your inquiry on unpermitted manufacturing uses that are not covered in the consent decree. Sven will get back to you directly.

Thanks,  
Carolyn
